Quick Start Instructions for your Peterson BodyBeat™ Sync BBS-1

To turn the BBS-1 on, press and hold the  START/STOP button. Be sure to put the battery in place first; it has been packed separately in the bottom of the shipping box.

To turn off the BBS-1, hold the SHIFT (STORE) button and then press and hold the  START/STOP button.

Be sure the “lock” slide switch is in the unlock position. The lock icon  shows when buttons are locked to prevent accidental use.

The BBS-1 can be charged from any USB charger. If desired, AC chargers can be purchased at www.PetersonTuners.com.

Plug the vibe clip into the jack on the upper left side of the BBS-1. The audio will be silenced when the vibe clip is plugged in. Clip on the vibe clip so that it presses firmly against your body. The barrel portion should be against your body for the maximum intensity.

The “Mode” button determines whether the BBS-1 is used SOLO, as a MASTER, or in a group “SYNC’d” to a MASTER.

When designated as MASTER, press and hold the “Sync” button to start a group. The  icon will appear to show that the Master unit is in “Open Registration” and will allow other BBS-1 metronomes to join the group. Other BBS-1 metronomes can now join this group by setting their mode to SYNC and pressing the sync button. For more details see page 25 in the instruction manual.

The instruction manual gives clear instructions for the many functions of the BBS-1: please take a few minutes to review it.

If you experience any problems please **do not return the product to the store that you purchased it from**. First, look at the help desk and FAQ at www.PetersonTuners.com. If you continue to have problems, please open a help ticket from the website or contact Peterson at 1-708-388-3311. We guarantee your satisfaction and will assist you promptly in solving your issue.

 *Be sure to register your warranty at www.petersontuners.com/warranty in order to receive firmware update notifications and other important information regarding your BBS-1.*
